

Conflict Minerals Sourcing Policy

“Conflict minerals” originating from the Democratic Republic of the Congo (DRC) are sometimes mined and sold under the control of armed groups finance conflict characterized by extreme levels of violence. Some of these minerals can make their way into the supply chains of the products used around the world, including those in the electronics industry.

As part of HiFuture’s commitment to company responsibility and respecting human rights in our own operations and in our global supply chain, it is HiFuture’s goal to use tantalum, tin, tungsten and gold in our products that do not directly or indirectly finance or benefit armed groups in the DRC or adjoining countries while continuing to support responsible mineral sourcing in the region.

HiFuture expects our suppliers to have in place policies and due diligence measures that will enable us to reasonably assure that products and components supplied to us containing conflict minerals are conflict-free.

HiFuture expects our suppliers to conduct their business in alignment with HiFuture’s supply chain responsibility expectations.

In support of this policy, HiFuture will:

- Exercise due diligence with our suppliers and encourage our suppliers to do likewise with their suppliers;
- Provide, and expect our suppliers to cooperate in providing, due diligence information to confirm
- Guarantee that the tantalum, tin, tungsten and gold in our supply chain are conflict-free;
- Collaborate with our suppliers and others on industry-wide solutions to enable products that are conflict-free.
- Commit to transparency in the implementation of this policy.

In case any of the “non-conflict free” material may be identified in what bought by HiFuture, any proper action will be adopted to make our products “Conflict Free”.

Adopted on Dec. 1, 2017
